

Logical access

Secured solution for filing and document management

Document Management & Workflow Solution

- LOGICAL ACCESS SUITE is a document management and archiving software. LOGICAL ACCESS SUITE, particularly solid and secure, is a very modular/flexible solution and can be customized according to the clients' needs.
- LOGICAL ACCESS SUITE allows the management and filing of all Spools/Cold documents, digitalisation of all paper documents (with automatic filing of documents with barcodes recognition or OCR) and the filing of all Office documents, Mail or PDF.
- Due to a strong historical establishment in the banking environment, LOGICAL ACCESS SUITE ensures a reinforced security of the information archived: documents can be electronically signed (to guarantee their non-modification from the moment they are filed), encrypted (in order to guarantee their viewing is made only within the protected framework of the application) and even compressed.
